Textbook Survey Results

The textbook survey has been completed. Congratulations to Diane Stamm with Lord Fairfax Community College who won the \$200 Amazon.com drawing. Also, thanks to everyone that sent in a completed survey. We had a very good return rate: 23 associate degree programs and 89 one-year programs returned a survey.

The following is a list of the textbooks by subject area that were indicated in the survey results as being the most often required by programs for students to use in their studies. Hopefully these results will help program directors, in particular new ones, determine what books to request as a desk copy for review purposes and aid in making a decision as to which book is best for the students in their program.
